CMR2013 Announcement

The next Contrast Media Research (CMR) symposium will take place at Novotel Xinqiao Hotel in Beijing, China, on November 2 through 5, 2013. CMR was initiated by Elliot Lasser, San Diego, in 1970 and has had 15 subsequent meetings. It has been and continues to be a unique gathering where top-level researchers from academia and industry have an opportunity to exchange up-to-date thoughts and new data in a collegial and open forum.

The format of CMR balances lectures and scientific sessions, with discussion between the audience and speakers playing a major role. Program topics include but are not limited to: novel contrast agents, X-ray CT contrast agents, ultrasound contrast agents, MR contrast agents, cellular and molecular imaging, optical contrast for surgical navigation, and safety of contrast media. All papers presented at CMR 2013 will have their abstracts published in the journal *Investigative Radiology*.

Participation is limited to those having received notice of acceptance of their abstract (submission deadline June 30, 2013). If an abstract is accepted for presentation, lodging and meeting expenses of the attendee will be covered by the Organizing Committee as far as funding permits. Attendees will be financially responsible for travel to and from the meeting site. Attendees are expected to participate in the entire conference from Sunday morning (9.00 a.m.) through Tuesday evening.

A spouse rate of $500 includes all meals that are part of the meeting. The amount must be paid on arrival to the meeting organizers.
